2. Applicant is given **one month**, or thirty (30) days, whichever is longer, from the mail date of this notice to supply the correction, if the non-compliant amendment is one of the following: a preliminary amendment, a non-final amendment (including a submission for a request for continued examination (RCE) under 37 CFR 1.114), a supplemental amendment filed within a suspension period under 37 CFR 1.103(a) or (c), and an amendment filed in response to a *Quayle* action. ## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. Receipt is acknowledged of a request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e) and a submission, filed on February 23, 2006. The submission, however, is not fully responsive to the prior Office action because newly submitted claims 42-61 are directed to inventions that are independent and distinct from the invention originally claimed as further detailed below. In particular, originally submitted claims 22-41 deal with a method that includes irradiating a substrate with near infrared light, with some of the light being absorbed by said substrate. However, newly submitted claims 42 and 52 fail to require such an irradiating step. On the other hand, newly submitted claims do require positioning and heating a block against a surface of a resilient sheet- these limitations are not required by the originally presented claims. As such, it is evident that the claims are directed to different inventions, each having a unique and separate means for establishing patentability. Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. See 37 CFR 1.142(b) and MPEP § 821.03. However, applicant has canceled originally drafted claims 22-41 and thus, there are no pending claims in the current application.

It is further noted that a further restriction between independent claims 42 and 52 is applicable as the inventions are related as method and apparatus. In this instance, the apparatus can be used in a materially different method, such as one in which

different electrical components are being adhered or one in which substrates different than those detailed in the claimed invention are being adhered.

Since the submission appears to be a *bona fide* attempt to provide a complete reply to the prior Office action, applicant is given a shortened statutory period of ONE MONTH or THIRTY DAYS from the mailing date of this letter, whichever is longer, to submit a complete reply. This shortened statutory period for reply supersedes the time period set in the prior Office action. This time period may be extended pursuant to 37 CFR 1.136(a).
